

## Lab Requirement 2 - Linux Basics (2)

### Requirement

1. Create a new user named "newusr"
2. Switch to "newusr"
3. Add the old user to the group of the "newusr"
4. Make a file named myfile
5. Change the permission of the group to read and write
6. Switch back to the old user
7. View the groups of the old user ("newusr" group shall be in them)
8. Try writing "hello" into "myfile"
9. Remove the "newuser"
